SUMMARY

Fresh graduate in Computer Science with experience in data analysis, interactive dashboard creation, and website development. Proficient in Excel, SQL, Python, Looker Studio, and data visualization, with a focus on insight-driven decision making. Has experience in remote internships and working on business analysis and price prediction projects using machine learning.

EDUCATION

Universitas Islam Sultan Agung   **Semarang, Indonesia**
Bachelor of Informatics Engineering; GPA: 3.86/4.00   Sept 2021 - Jun 2025

SKILLS

Hard Skill: Data Analysis, Data Documentation, Spreadsheet, Reporting, Dashboarding, Database Querying, Business Insight Generation, Web Development.

Soft Skill: Digital Literacy, Analytical Thinking, Information Design, Data Accuracy, Data Storytelling, Communication, Team Collaboration, Task Coordination, Continuous Learning.

Tools: Ms,Excel, Looker Studio, Canva, SQL Server, XAMPP, Github, Google Colab, .NET.

Programming: SQL, Python, HTML, CSS, JavaScript, PHP, C#.

EXPERIENCE

Data Analyst Intern | **RevoU (Remote) |** View More   **Feb 2024 - Jun 2024**
- Analyzed business problems and prioritized key issues for a pizza shop case study, identifying trends and insights that increased potential revenue opportunities by **15%**.
- Cleaned, processed, and managed **48,000 rows** of sales and customer data using SQL, Google Spreadsheet, and Google BigQuery.
- Developed an interactive dashboard in Looker Studio to visualize sales metrics, including **total revenue of $15K**, **average order value of $26**, and **monthly sales trends across 12 months**.
- Applied data visualization principles and presented findings to stakeholders, highlighting actionable insights regarding **XL and XXL pizza size preferences**.

PROJECTS

E Commerce Dashboard | Spreadsheet, Looker Studio | View More   **November 2025**
- Reporting daily sales trends, new customer acquisition (44.9%), and revenue breakdown by city, product category volume, and payment method, identifying top-performing regions and purchasing behaviors to support sales strategies.

E Commerce Dashboard | Spreadsheet, Looker Studio | View More   **November 2025**
- Reporting monthly revenue trends (2022–2025), market share by brand, and top product performance, identifying peak transaction times and high-value items to support inventory and operational strategies.

Web Cryptocurrency Predict (TCN Model)|Python, VsCode, Streamlit |View More   **November 2025**
- Developed a web-based Ethereum (USD) price prediction application deployed on Streamlit, utilizing TensorFlow and Keras to build a Temporal Convolutional Network (TCN) model for time-series forecasting.
